

Drumsticks

Description

Turn your iPhones/iPods into real-life drumsticks by simply swinging them in the air!

Drumsticks is an innovative new way to play the drums on your iPhone/iPod. Unlike other apps, Drumsticks doesn't reduce you to tapping your fingers on the screen like a loser. Instead, hold one iPhone/iPod in each hand like a drumstick and play!

Exclusive single-handed control of two drum types: swing edge-down or face-down to choose the "drum" to hit.

This single app will support both left-handed and right-handed play: Use it on two devices for super-awesome dual-handed action!

IMPORTANT:

Just swing the phone in the air and PRETEND to hit a drum. Do not actually hit anything. The app will figure it out and play the right sound on cue. Geez.

FEATURES

- * Intuitive air drumming controls
- * Awesome double-fisted play
- * Two drums and two cymbals for rockin' out
- * No musical skills required
